

Daily Safety Checklist

Automatic Sliding Door

These minimum safety checks, in addition to those in the Owner's Manual, should be made each day and after any loss of electrical power.

1. Walk toward the door at a normal pace. The door should open when you are about 4 feet from the door.
2. Stand motionless on threshold for at least 10 seconds. The door should not close.
3. Move clear of the area. The door should remain open for at least 1.5 seconds, and should close slowly and smoothly.
4. Repeat steps 1 through 3 from other direction if door is used for two-way traffic.
5. Inspect the floor area. It should be clean with no loose parts that might cause user to trip or fall. Keep traffic path clear.
6. Inspect door's overall condition. The appropriate signage should be present.
7. HAVE DOOR INSPECTED BY AN AAADM INSPECTOR AT LEAST ANNUALLY.

DO NOT USE DOOR if it fails any of these safety checks or if it malfunctions in any way. **Call your qualified automatic door service company to have door serviced or repaired.**
